

Quiz Review Checklist

Stephen Flood

Preparing for the quiz begins a full week before!

1 Before Each Class

- Read the previous day's notes.
- Make sure you remember how to do the previous day's homework.
(Pick a few problems, try to answer them, and then check your answers).
- Skim today's chapter.
- Circle the end of section problems from the Syllabus.

2 After Each Class

- Re-read your notes carefully.
- Try to answer the end of section problems using what we've done in class.
- Read the chapter in the book. Pay careful attention to material that is related to what we did in class.
- Do all of the homework problems before the next class. **Practice showing all the steps we showed in class.** The more work you show during your practice, the better you will do on quizzes!

The week of the quiz, you should **reflect** on the previous week's material, reinforce your understanding, and prepare to take the quiz.

3 Studing for the Quiz

- Identify the types of problems covered since the last quiz.
- Re-read the notes and the textbook, to refresh your memory.
- Do several practice problems for each type of problem.
- Pick out a few homework problems, and give yourself a timed practice quiz. No notes, no friends, no texting, no internet. Just you, a pencil, and some paper!
- Grade your practice quiz. Also compare your work with the class notes. Did you show all the important steps? Did you organize your work carefully?

4 The day of the Quiz

- Re-take last night's practice quiz. Can you still answer the questions cleanly and correctly?
Do you **show all important steps**?
- Take a break. Have a snack and drink some water.
- Arrive on time.
